OBJECTIVE

I am eager to leverage my skills and experience to enhance the company's success while furthering my professional development. With a hands-on leadership style, I believe in actively contributing to solutions and inspiring others to excel alongside me. My focus on creating efficient, low-maintenance, and automated solutions reflects my commitment to streamlining processes for the benefit of our team. I look forward to contributing to a dynamic environment where innovation and growth are encouraged.

EDUCATION

University of Kansas
Lawrence, KS
Bachelor of Science in Business, Business Analytics
Graduated - May 2020

Core curriculum provided sound knowledge of business/data analytics with problem solving and innovation skills to create robust, efficient, reliable business intelligence from beginning to end of its lifecycle.

Data Modeling	**Business Analytics**	**Project Management**
Statistics & Forecasting	**IT Infrastructure**	**Database Architecture**

Certificates

Microsoft Certified: Power BI Data Analyst Associate - PL-300
Qlik Sense Data Architect - Qlik
Foundations of Cybersecurity – Google Coursera

EXPERIENCE

Chicago Atlantic Advisor LLC (Feb 2025 – Aug 2026)
Analytics Associate

- Worked directly with the Borrower company which specialized in **LEGAL** cannabis manufacturing, transportation and selling in the state of Missouri
- Developed an application for all the data needs of the Borrower company to track the product and financial success using KPIs
- Pulled data from multiple API sources into an Azure data schema using Power Automate
- Regularly checked source data using Postman when a data discrepancy came up between the application and database
- Developed Application using Qlik to Fulfill any data needs
- Performed QA on application and pushed to production environment
- Sent weekly automated emails to investors
- Sent daily automated emails to general managers and external staff of the borrower company
- Kinda automated myself of a job wanted to add more to skillset instead of doing again

Kru-Marc
Naperville, IL
Business Intelligence Consultant (Jan 2022 – Feb 2025)
Responsible for data in all phases of the data lifecycle

- Extract – Pull data from relevant sources into database and relevant information from end-users
- Transform - Clean and manipulate data into usable and wanted information
- Load – Push data into reporting tool for end-users
- Report – Model and display data for end-users
- Train – Teach end-users on how best to utilize reports
- Update – Talk with end-users and Add feedback existing product

Advanced SQL knowledge

- Regularly query databases with millions or even billions of rows (pharmaceutical/transactional)
- Optimized query creation to handle big data
- Created DB infrastructure to make unusable raw data usable
- Create aggregation queries that allowed previously unused big data to be examined and mined into
- Automate where possible to keep data up to date and maintenance low prefer semi-automation for a check

Business intelligence tools (Power BI, Qlik)

- Able to connect to databases and pull in data (Knowledge of Power BI Gateway and Qlik QVDs)
- Model data in either star or snowflake schema (star for performance/simplicity and snowflake when needed)
- Data transformations (M/Qlik Script)
- Expressions (DAX/ Set Analysis)
- Design easy to use visualizations and reports for end user
- Communicate with end users on how to use the BI tool and about additional features they would want added

Project Management

- Standard Product life cycle utilization
- Azure DevOps

Python

- Created my own website with Django backend and is being hosted on AWS
- Created automated ETL scripts (Pandas)

MMD Services

Technical Recruiter (Aug 2020 –Dec 2021) Chicago, IL

- Sourced potential candidates via job boards, LinkedIn, and wherever I could find them
- Gathered technical requirements from client companies
- Called candidates that are potential fits in the client's role and conducted interview

Illinois Credit Union League Naperville, IL

Financial Analyst - Internship (May-Aug 2019)

- Served an internship with the Finance and Compliance department for the leading credit union association.
- Worked with Data Architect and Sr Business Analyst to design target SQL platform and data table structure.
- Developed ETL scripts to extract data from disparate information sources – Sales Force, legacy databases and Excel
- Presented weekly status updates to the team and regularly reviewed report prototypes with business stakeholders.
- Used SQL and Power- BI tools to build executive reports and dashboard for financial leadership.

Loras College Dubuque, IA

Camp Counselor **(**May-Aug 2017-2019)

- Supervised and guided children (8-14) at a sports-oriented summer camp. Provided coaching and encouragement through team and individual activities.
- Organized daily tasks to ensure children safety, to keep everyone on schedule and to ensure everyone is included.
- Helped my peers learn the tips and tricks of being a good camp counselor.
