James Leonard

Chicago, Illinois | 1-630-607-2904 | JPLeonard98@Gmail.com | LinkedIn | JPLeonard.org

Professional Summary

Results-oriented Data Analytics & Business Intelligence Specialist with 5+ years of experience building scalable data pipelines, enterprise dimensional models, and automated reporting systems. Proven expertise optimizing complex SQL queries across multi-million/billion-row datasets, integrating multi-source REST APIs via Power Automate, and deploying interactive dashboards in Power BI and Qlik Sense. Certified in Power BI, Qlik Sense Data Architecture, Google Data Analytics, and Cybersecurity.

Technical Skills

Business Intelligence & Visualization: Power BI (DAX, Power Query/M, Gateway), Qlik Sense (Set Analysis, QVD Architecture), Executive Reporting, KPI Dashboards, Excel

Databases & Data Modeling: SQL (Advanced Query Optimization, Subqueries, Stored Procedures, Views), Star & Snowflake Schemas, Database Architecture

Cloud & ETL Automation: Azure Cloud, Power Automate, REST APIs / Postman, Python, AWS

Programming & Tools: Python (Pandas & Django), HTML/CSS/JavaScript, Azure DevOps, Git, VBA

Education

University of Kansas - Lawrence, KS
Bachelor of Science in Business Analytics

Certifications

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)**
- **Qlik Sense Data Architect**
- **Google Data Analytics Professional Certificate**
- **Google Cybersecurity Professional Certificate**

Professional Experience

American Data Refinement LLC / Traveling **Chicago, IL**
Founder *June 2026 – Present*

- Founded an end-to-end data consulting LLC delivering custom database integrations, SQL optimization, and BI reporting solutions for commercial and government clients.
- Architected and deployed full-stack client acquisition and e-commerce infrastructure paired with targeted Google Ads campaigns.

- Secured federal contracting eligibility by completing full System for Award Management (SAM.gov) registration and compliance setup.
- Crafted and executed research-based email marketing strategies.
- Developed showcase portfolio for client demos and consultations.
- Backpacking Thailand, Laos, Vietnam, Cambodia, India, Malaysia, Indonesia and the Philippines.

Chicago Atlantic Advisors LLC **Chicago, IL**

Analytics Associate *Feb 2025 – June 2026*

- Partnered directly with a major commercial enterprise borrower in the cannabis manufacturing, logistics, and retail space to architect a unified enterprise analytics ecosystem.
- Developed a comprehensive Qlik Sense BI platform providing stakeholders complete visibility across financial performance, supply chain operations, retail KPIs, and marketing effectiveness.
- Engineered automated ETL pipelines in Power Automate to ingest real-time data from disparate third-party REST APIs into a centralized Azure database schema.
- Validated API endpoints and debugged schema discrepancies using Postman, maintaining strict data integrity between raw sources and the reporting warehouse.
- Built custom web scraping tools to extract public state regulatory sales figures, merging them with internal financials to deliver comparative market share analyses.
- Automated cross-functional email dispatch workflows, delivering daily operational alerts to general managers and weekly executive performance summaries to institutional investors with a monthly and yearly summary.
- Established QA protocols and managed continuous deployment cycles from development into testing into production.

Kru-Marc Inc **Naperville, IL**

Business Intelligence Consultant *Jan 2022 – Feb 2025*

- Managed complete data lifecycles translating business questions into scalable BI solutions.
- Authored, refactored, and tuned complex SQL queries against multi-million and billion row production databases, aggregating previously unmined data for executive decision-making.
- Designed and maintained robust database architectures and dimensional models.
- Automated recurring data extractions and transformations using reducing manual maintenance.
- Designed user-friendly dashboards with Power BI and Qlik leveraging advanced DAX expressions and Qlik Set Analysis to deliver interactive insights for non-technical end users.
- Created 50+ dashboards using a variable based SQL methodology.
- Partnered with client stakeholders to gather iterative requirements, conduct end-user dashboard training, and manage release pipelines via Azure DevOps.
- Created weekly status reports that identified what was done the previous week and outlined the priorities for next week.
- Mentored and managed three junior employees on different projects.
